

How Far You'll Go

**When you've been around
Like I've been around
You tend to see
Things differently**

**When you've been down
Like I've been down
You start again
More carefully**

**It's all right there before you
The sages simply state it
We're the ones who go and
Complicate it**

**When you're all alone
Like I was alone
You face the truth
Within yourself**

**And when you're on your own
I was on my own
You get it's you and
No one else**

**Who knows how to define you
And lets your heart refine you
With shadows to remind you
Of how far you've come**

And how far you'll go.....

**When you lost love like
I lost love
You learn to treat it
preciously**

**So when you found love like
I found love
You hold it close
And graciously**

**Cause Someone's there beside you
Spreading light around you
With shadows to remind you
How far you've come (2x)**

And how far you'll go....
